PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/671,632	Applicant(s) KINOSHITA, HARUHIKO	
	Examiner Farhad Ali	Art Unit 2109	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 9/29/2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 29 September 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claims 1-10 of U.S. application 10/671,632 filed on 9/29/2003 are presented for examination.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, and 6-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Raverdy et al. (US 2002/0069419 A1).

3. With regard to claims 1 and 7 Raverdy et al. discloses an event program distribution system and method is already known (paragraph [0003] "streaming video information to a user device"), comprising:

an event gathering system connected to the network (paragraph [0008] "Local area network (LAN), an event server");

a plurality of program receiving sites connected to the network (Fig. 7 reference numerals 114(a) and 114(b)) for transmitting a request message to the network

(paragraph [0030] "system user may also request individual video-on-demand services"), each of said receiving sites having a screen whose size is sufficient to be

Art Unit: 2109

viewed by public audience (Fig. 10 reference numeral 1032 and paragraph [0039]

“display preferably may include any effective type of display”);

a server connected to the network (paragraphs [0009] “base station may preferably be coupled to the LAN”) for responding to said request message with a blank- application form (paragraphs [0040] “may preferably include any effective means to remotely communicate with an external entity such as LAN or Internet, to thereby exchange relevant information”]) to said receiving sites via the network, said application form containing at least one scheduled event program and a scheduled date and a time scale of the program, the time scale indicating opening and closing times of day of the event program (paragraphs [0053] “access rights module may preferably receive one or more time-stamped access capabilities for various services” and paragraph [0055] “channel module”);

said program receiving sites being responsive to said blank application form for returning a filled-in application form to the server via the network, said application form indicating one or more requested event programs (paragraphs [0040] “may preferably include any effective means to remotely communicate with an external entity such as LAN or Internet, to thereby exchange relevant information”]);

said server being responsive to said filled-in application form for mapping each of a plurality of requested event programs indicated in the application form in a memory to one or more requesting program receiving sites, monitoring the memory for detecting the date and time scales of each event program (paragraphs [0055] “channel module may determine which program channels and program sources are currently available..

Art Unit: 2109

may also set up specific connection information between event server and user device”), receiving an event program from the event gathering system if the scheduled date and opening time of day of the program are detected, and for distributing the received event program to one or more program receiving sites (paragraphs [0055] “channel module may determine which program channels and program sources are currently available.. may also set up specific connection information between event server and user device”), until the scheduled closing time of day of the program is detected (paragraph [0058] “associated with one or more time-stamped access capabilities” indicating access to event only from start to scheduled closing time).

4. With regard to claims 2 and 8, Raverdy et al. discloses the event program distribution system of claim 1, wherein said event program is distributed on a real-time basis (paragraph [0013] “preferably produced in real time”).

5. With regard to claims 6 and 9, Raverdy et al. discloses the event program distribution system of claim 1, wherein said program receiving sites establish a two-way speech path to said event gathering system (paragraph [0043] “user device may also utilize I/O interface(s) to bi-directionally communicate with a host computer”).

6. With regard to claim 10, Raverdy et al. discloses a computer readable storage medium embodying a program for executing the steps of claim 7 (paragraph [0044] “one or more removable storage media interfaces may preferably be utilized”).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raverdy et al. (US 2002/0069419 A1).

9. With regard to claims 3, 4, and 5, Raverdy et al. discloses all the limitations of claim 1 and locations that are receiving sites.

Raverdy does not, however, specifically disclose that the said receiving sites are to include a game center, movie theater or karaoke hall.

It would have been obvious at the time of the invention to one of ordinary skill in the art that a game center, movie theater or karaoke hall is a type of receiving site and Raverdy teaches utilizing types of receiving sites and locations. It would be obvious for one to include these specific types of receiving sites because they are examples of the disclosed inventions embodiments.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Farhad Ali whose telephone number is (571) 270-1920.

The examiner can normally be reached on Monday thru Friday, 7:30am to 5:00pm.

Art Unit: 2109

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey C. Pwu can be reached on (571) 272-6798. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
